Ok So

The server is in online mode....so we need mcleaks

Ok...

Really? nice

wait

there is a problem

it might not work since....well....if you don't have the same ip as the account, you can not log in

something i picked up

when i am on vpn, i cannot login to minecraft with my account

like i said neither worked

crap

is it because im using the new one?

I love tlauncher

it won't work on here though. I tried. i'll try again

yes that one

ik

no

jusandrew is eh...

he spambots

thats really it

idk if he will be ok with this and join us, but ik he won't report us

yeah

i just thought of something that can ruin us all

if admins get suspicious and look at my ip, they will see that i am exploitinfashion

they noticed a pattern. rn im their biggest threat, so they are looking for me constantly...

a pattern in my ip

it always starts with 95 and ends with 52

no matter what vpn i use

Currently no one is the biggest threat on the server

At least before it wasn't

out of 107 vps 3 of them work lol

Or it was idk it depends on how u see it xd

wait

shit

what happened?

i added the account i used it and pressed play... but it is acting like its cracked

im using reinbo

like hacked?

i love wurst

but i wanted to dial down so i use liquidbounce only if i have to

i used that

its eh

still acting like im cracked

...

lol

don't mind me im just doing my own thing

k

@Lord of the Twisted Dimension

it won't fucking go to a premium account  
that didn't work

ugh

im just using mcleaks

mcleaks is the next best thing
